

**Northern Illinois Fire Sprinkler Advisory Board's response following Alderman Bernard Stone's comment to the media that fire sprinklers would not have made a difference in the LaSalle Bank high-rise fire:**

“Alderman Stone’s statement to the media that fire sprinklers would not have made a difference in the LaSalle Bank fire is blatantly erroneous. The fact is one or two quick-response fire sprinklers would have prevented the fire from spreading just as fire sprinklers would have prevented the six deaths in the Cook County Building fire 14 months ago.”
